

ULTRA TRED WATERBORNE EPOXY

This highly durable, abrasion resistant coating is great for garages, concrete floors, and many other wall, trim and floor areas where exceptional performance is demanded. This catalyzed two-part coating is resistant to "hot tire pickup" making it an ideal garage coating. It can be applied over properly prepared bare and previously painted surfaces.

Ultra Tred is easy to clean. It has excellent chemical, solvent and stain resistance. It makes an excellent coating for concrete, concrete block, wallboard, plaster, fiberglass, wood (not hardwood floors) and many types of metals. Its low odor makes it an outstanding product for homes, schools, plants, warehouses, hospitals, and manufacturing facilities.

Ultra Tred comes in two ready-mixed gray shades and is available in an unlimited array of colors. Three Color Flakes combinations are also available to provide a multicolored decorative look to your floor.

Ultra Tred covers approximately 250 sq. ft. per gallon kit. Under normal conditions, Ultra Tred dries to the touch in 4-6 hours. Light use and foot traffic are usually acceptable after 24 hours. Ultra Tred will not fully cure for several days and should not be driven on until completely cured.

CAUTION: FLOOR FINISHES ARE MORE SLIPPERY WHEN THE SURFACE BECOMES WET OR CONTAMINATED BY DIRT, OILS, FOOD/BEVERAGE RESIDUES OR OTHER DEBRIS. TO ATTAIN THE BEST POSSIBLE SKID RESISTANCE, KEEP COATED AREAS DRY, PROPERLY CLEANED AND MAINTAINED.
