Everlife Waterborne Enamel

Everlife Waterborne Enamel High Gloss - A durable 100% acrylic, ceramic reinforced waterborne enamel provides a fast dry gloss finish for many general maintenance requirements. It provides superior color retention and moisture resistance when used exterior and is rust inhibiting when applied in the proper system.

Everlife Waterborne Enamel Satin is especially designed for use on interior and exterior surfaces. The tough, durable latex film dries to a medium gloss finish and can be lightly walked upon in about 4 hours after painting. Its excellent adhesion, toughness and resistance to alkalinity makes this an ideal all purpose floor finish. Its resilient surface makes for a durable wall and trim semigloss for interior and exterior substrates. Recommended for areas where safety (ignitable fumes) and rapid dry are major considerations, and for concrete floors where dusting is a problem.
